01/2022 - 01/2024

React · Angular · Angular Material · Typescript · RxJS · Sass · Gatsby · NextJS · AWS

FrontEnd Developer | Billennium

11/2021 - 01/2022

React · Angular · Typescript · Javascript · RxJS · Sass · Gatsby · Storybook

Junior JavaScript Developer | ArdentCode

06/2021 - 11/2021

TypeScript · React.js · Redux.js · Webpack · Node.js · IndexedDB · GitHub · Typescript · Javascript

...

More detailed description can be found on the next page as well as on my [LinkedIn profile](https://www.linkedin.com/in/adrian-zinko/) (<https://www.linkedin.com/in/adrian-zinko/>).

SKILLS

Technical Skills:

- Strong understanding of JavaScript language
- Proficient in React and Angular frameworks
- Proficient in TypeScript and RxJS
- Experience in backend development with NodeJS (Express, NestJS)
- Working with AWS and Azure Cloud services
- Familiarity building production CI/CD processes
- Familiarity with NextJS, Gatsby, and GraphQL

Other Strengths:

- Experience working in Scrum environments
- Experience facilitating Event Storming sessions
- Technical recruitment experience
- Mentoring aspiring Frontend/Full-stack developers
- Hosting internal JavaScript meetups
- Dedication to deliver quality results
- Adopting pragmatic and reliable solutions to encounter challenges

Personal Interests:

- Passion for cats and mountains
- Outdoor activities (ex. Padel board)
- Trying to automate all the boring tasks (enhanced by AI)
- Long-term stock investor

LANGUAGES

English - communicative (C1)

- direct communication with client from US
- writing documentation

CERTIFICATES

- ANF (architekturanafroncie.pl)
- DNA (<https://droganowoczesnegoarchitekta.pl>)
- Domain Drivers (<https://domaindrivers.pl>)
- Opanuj Frontend (<https://www.opanujfrontend.pl>)

Of course there are more but these 4 have significantly impacted my professional development.

CAREER DETAILS

Senior Software Developer | Accenture 01/2024 - now

- Work on design and implementation of internal product for monitoring various resources from other platforms
- Work in the R&D team for a client from big pharma
- Develop responsive web application using the latest NextJS and Azure Cloud services like CosmosDB, Azure Functions, Blob Storage
- Architect deployment process, CI/CD through GitHub Actions on self-hosted VM
- Speak directly with clients mapping their needs to our solution, show outcome of our increments during demos
- Discuss every idea with PO and Designer, making suggestions around app optimization
- Migrate app repository from Azure DevOps to Github
- Lead small team of frontend developers in internal web app

JavaScript Developer | Boldare 01/2022 - 01/2024

- Responsible mainly for the Frontend Development of apps for various clients.
- Working on an internal application (frontend built from scratch on Angular 14+) for a client based in the US (2x frontend developers, 3x backend developers, 1x qa, 1x scrum master, 1x product designer, 1x product strategist).
- Build complex search mechanism (combobox with various filters based on users feedback)
- Extending functionality for the company's automation Slack bot tool (generating scheduled chart with specified employees data)
- Build extensive search on company's blog.
- Provide early development estimation for a couple of products.
- Gathered my first experience in decentralized work management system, Holacracy, the roots of the company I'm working for.

FrontEnd Developer | Billennium 11/2021 - 01/2022

- Unit testing for key website components in Jest
- Release snackbar component based on design from Figma file
- Collaboration with team members from Germany and Poland

Junior JavaScript Developer | ArdentCode 06/2021 - 11/2021

- Responsible for improving test coverage for React components/utils/services (based on key metrics - 80% threshold)
- Creating MVP (PWA) suited entirely for mobile devices - real-time navigation for the special maps provided by botanics specialists. Maps could be uploaded through the app and stored locally on each device's browser (with the help of IndexedDB).
- Integrating measurements from Garmin devices with the company's internal app. Integration consisted of Garmin OAuth and .fitfile conversion.

Recent commercial projects

- **DesignCursor** 08/2023 - present
 - Website/blog for community of UI/UX enthusiasts. Web development, ideation.
Tech used: [Astro](#), [React](#), [Typescript](#)
- **Internal application for a client based in the US** 06/2022 - 01/2024
 - Sector: loss prevention. Frontend built on [Angular 14+](#), [Angular Material](#), [NgRx](#). Scrum team of around 10 colleagues. Complex data visualizations, dashboard screens with various charts presenting data for further investigations.
- **Sharpslide** 04/2022 - 07/2022
 - App allows to build custom presentations based on set of templates. Subscription plan required (Stripe payments). Tech used: [React/Redux](#), [Typescript](#)
- **Akuity** 03/2022 - 06/2022
 - Business website built for SaaS company. Landing/Blog sections. Tech used: [Gatsby](#), [Typescript](#), [SCSS](#)
- **Bootcamp Mentor (Full Stack - JavaScript) @Kodilla**
